## Description

The Symantec Endpoint Protection 14.x Administration R1 course is designed for the network, IT security, and systems administration professional in a Security Operations position tasked with the day-to-day operation of the SEPM on-premise management console and with configuring optimum security settings for endpoints protected by Endpoint Protection.

## Objectives

By the completion of this course, you will be able to:

- Describe how the Endpoint Protection Manager (SEPM) communicates with clients and make appropriate changes as necessary.
- Design and create Endpoint Protection group structures to meet the needs of your organization.
- Respond to threats using SEPM monitoring and reporting.
- Analyze the content delivery system (LiveUpdate).
- Configure Group Update Providers.
- Create location aware updates.
- Secure endpoints against network and file-based threats
- Control endpoint integrity and compliance
- Enforce an adaptive security posture

## Prerequisites

This course assumes that students have a basic understanding of advanced computer terminology,

including TCP/IP networking and Internet terms, and an administrator-level knowledge of Microsoft Windows operating systems.

## **Follow on courses**

Students interested in Administration of Symantec endpoints utilizing the cloud management interface available as part of Symantec Endpoint Security Complete should take the following course:

- Symantec Endpoint Security Complete Administration R1

## **Test and Certification**

250-428: Administration of Symantec Endpoint Protection 14

## **Session Dates**

On request. Please [contact us](#)
