## Description

### Master the Future of Networking: Harness AI for Automation, Security, and Next-Generation Efficiency

This course provides professionals with the basic knowledge and advanced skills needed to understand the combination of artificial intelligence and current networking technologies. It discusses fundamental networking concepts, newer technologies such as SDN and NFV, and how AI can enhance network efficiency. Important focus areas consist of AI-powered network automation, orchestration, and security upgrades, combined with hands-on projects and practical labs for real-life implementation. The class ends by examining new developments and upcoming pathways in AI-enhanced networking, getting students ready for leading positions in this quickly changing sector.

The following tools will be explored in this course:

- Elastic
- Juniper
- Netdata

## Objectives

- AI-Powered Network Automation  
Ability to design, implement, and manage automated network operations using AI, optimizing efficiency and reducing manual intervention.
- Network Optimization through AI  
Skills in applying AI and machine learning algorithms to optimize network performance, improving speed, reliability, and scalability.
- AI-Enhanced Network Security  
Expertise in utilizing AI to detect and prevent cyber threats, including AI-driven threat intelligence and network monitoring.
- AI for Incident Response and Cybersecurity Intelligence  
Ability to leverage AI for real-time network security incident detection, response, and forensics, enhancing cybersecurity measures.

## Audience

It's designed for network engineers, cybersecurity professionals, and AI developers.

## Prerequisites

- Basic understanding of networking fundamentals.
- Familiarity with programming languages such as Python.
- Fundamental knowledge of AI and machine learning concepts.
- Experience with network management tools and technologies is a plus.

There are no mandatory prerequisites for certification. Certification is based solely on performance in the examination. However, candidates may choose to prepare through self-study or optional training offered by AI CERTs® Authorized Training Partners (ATPs).

## Programme

## **Module 1: Networking Foundations**

- 1.1 Basic Networking Concepts
- 1.2 Networking Protocols and Standards
- 1.3 Network Infrastructure and Design
- 1.4 Introduction to Network Security

## **Module 2: Advanced Networking Technologies**

- 2.1 Network Virtualization and Cloud Networking
- 2.2 Emerging Network Architectures
- 2.3 Advanced Routing and Switching
- 2.4 Network Storage and Data Centers

## **Module 3: AI in Networking**

- 3.1 Introduction to AI and Machine Learning
- 3.2 AI-Driven Network Optimization
- 3.3 AI for Network Security and Threat Detection
- 3.4 AI-Enhanced Network Management

## **Module 4: Network Automation and Orchestration**

- 4.1 Fundamentals of Network Automation
- 4.2 AI-Driven Network Orchestration
- 4.3 Policy-Driven Network Management
- 4.4 Case Studies in Network Automation

## **Module 5: AI-Enhanced Network Security**

- 5.1 Advanced Threat Detection with AI
- 5.2 Secure Network Design and Architecture
- 5.3 AI for Cybersecurity Intelligence
- 5.4 Ethical Considerations in AI-Driven Security

## **Module 6: Practical Labs and Hands-On Projects**

- 6.1 Network Simulation and Emulation
- 6.2 AI-Driven Network Automation Projects
- 6.3 AI for Network Security Projects
- 6.4 Capstone Project (Using Google Colab and Azure cloud)

## **Module 7: Emerging Trends and Future Directions**

- 7.1 Future of AI in Networking
- 7.2 AI-Powered IoT Networks
- 7.3 Blockchain and AI in Networking
- 7.4 Continuous Learning and Career Development

## **Optional Module: AI Agents for Network Management**

1. Understanding AI Agents
2. Case Studies
3. Hands-On Practice with AI Agents

## **Follow on courses**

### **Recommended Certifications:**

- AI+ Security Level 1™
- AI+ Security Level 2™
- AI+ Security Compliance™
- AI+ Ethical Hacker™
- AI+ Security Level 3™

## **Test and Certification**

- AI-Powered Network Automation  
Ability to design, implement, and manage automated network operations using AI, optimizing efficiency and reducing manual intervention.
- Network Optimization through AI  
Skills in applying AI and machine learning algorithms to optimize network performance, improving speed, reliability, and scalability.

- **AI-Enhanced Network Security**  
Expertise in utilizing AI to detect and prevent cyber threats, including AI-driven threat intelligence and network monitoring.
- **AI for Incident Response and Cybersecurity Intelligence**  
Ability to leverage AI for real-time network security incident detection, response, and forensics, enhancing cybersecurity measures.

### Exam Details

- Duration: 90 minutes
- Passing Score: 70% (35/50)
- Format: 50 multiple-choice/multiple-response questions
- Delivery Method: Online via proctored exam platform (flexible scheduling)

AI CERTs requires recertification every year to keep your certification valid. Notifications will be sent three months before the due date, and candidates must follow the steps in the candidate handbook to complete the process.

### Session Dates

Date	Location	Time Zone	Language	Type	Guaranteed	PRICE
01 Jan 0001			English	Self Paced Training		kr5,400.00
