## IBM Planning Analytics: Administer the Technical Environment - Local

CODE:	LENGTH:	PRICE:
K05003G	8 Hours	kr3,040.00

### Description

This course provides Administrators with guidance on installing and administering the IBM Planning Analytics - Local environment. The course outlines how the architecture can be customized to fit into various infrastructures. Students will learn how to install and configure IBM Planning Analytics - Local, monitor system performance, and secure applications.

**Note:** Guided eLearning is a self-paced offering which includes web-based content for self-study and videos (including audio) that demonstrate activities.

If you are enrolling in a Self Paced Virtual Classroom or Web Based Training course, before you enroll, please review the Self-Paced Virtual Classes and Web-Based Training Classes on our Terms and Conditions page, as well as the system requirements, to ensure that your system meets the minimum requirements for this course. <http://www.ibm.com/training/terms>

### Objectives

Please refer to course overview

### Audience

Administrators

### Prerequisites

Basic knowledge of IBM Planning Analytics

### Programme

Installing IBM Planning Analytics Local  
Configuring IBM Planning Analytics Local  
Examining the architecture of IBM Planning Analytics Local  
Administering servers with the TM1 Operations Console  
Monitoring TM1 servers in the TM1 Operations Console  
Working with TM1 log files  
Examining the audit log  
Monitoring performance with control cubes  
Monitoring TM1 server performance in real time  
Broadcasting messages to clients  
Making a TM1 server unavailable  
Maintaining TM1 applications  
Securing Planning Analytics  
Working with TM1 users and groups  
Making TM1 objects and data accessible  
Transferring data in Performance Modeler  
Backing up TM1 servers and data
