Configuring BIG-IP LTM: Local Traffic Manager v16.1

CODE:	LENGTH:	PRICE:
F5N_BIG-LTM-CFG-3	24 Hours (3 days)	kr27,500.00

Description

This course gives network professionals a functional understanding of BIG-IP Local Traffic Manager, introducing students to both commonly used and advanced BIG-IP LTM features and functionality. Incorporating lecture, extensive hands-on labs, and classroom discussion, the course helps students build the well-rounded skill set needed to manage BIG-IP LTM systems as part of a flexible and high performance application delivery network.

Topics covered in this course include: v13 Course Topics

BIG-IP initial setup (licensing, provisioning, and network configuration)

A review of BIG-IP local traffic configuration objects

Using dynamic load balancing methods

Modifying traffic behavior with persistence (including SSL, SIP, universal, and destination address affinity persistence)

Monitoring application health with Layer 3, Layer 4, and Layer 7 monitors (including transparent, scripted, and external monitors)

Processing traffic with virtual servers (including network, forwarding, and reject virtual servers)

Processing traffic with SNATs (including SNAT pools and SNATs as listeners)

Configuring high availability (including active/standby and N+1 sync failover device groups, connection and persistence mirroring, and sync-only device groups)

Modifying traffic behavior with profiles (including advanced HTTP profile options, caching, compression, and OneConnect profiles)

Advanced BIG-IP LTM configuration options (including VLAN tagging and trunking, SNMP features, and packet filters)

Deploying application services with iApps

Customizing application delivery with iRules and local traffic policies

By the end of this course, the student should be able to use both the Configuration utility, TMSH, and Linux commands to configure and manage BIG-IP LTM systems in an application delivery network. In addition, students should be able to monitor the BIG-IP system to achieve operational efficiency, and establish and maintain high availability infrastructure for critical business applications.

Objectives

Introducing the BIG-IP System

Initially Setting Up the BIG-IP System

Archiving the BIG-IP Configuration

v13 COURSE OUTLINE Chapter 1: Setting Up the BIG-IP System Leveraging F5 Support Resources and Tools

Reviewing Nodes, Pools, and Virtual Servers

Reviewing Address Translation

Reviewing Routing Assumptions

Reviewing Application Health Monitoring

Reviewing Traffic Behavior Modification with Profiles

Reviewing the TMOS Shell (TMSH)

Chapter 2: Reviewing Local Traffic Configuration Reviewing Managing BIG-IP Configuration Data

Exploring Load Balancing Options

Using Priority Group Activation and Fallback Host

Chapter 3: Load Balancing Traffic with LTM Comparing Member and Node Load Balancing

Reviewing Persistence

Introducing SSL Persistence

Introducing SIP Persistence

Introducing Universal Persistence

Introducing Destination Address Affinity Persistence

Chapter 4: Modifying Traffic Behavior with Persistence Using Match Across Options for Persistence

Differentiating Monitor Types
Customizing the HTTP Monitor
Monitoring an Alias Address and Port
Monitoring a Path vs. Monitoring a Device
Managing Multiple Monitors
Using Application Check Monitors

Chapter 5: Monitoring Application Health Using Manual Resume and Advanced Monitor Timer Settings
Understanding the Need for Other Virtual Server Types
Forwarding Traffic with a Virtual Server
Understanding Virtual Server Order of Precedence

Chapter 6: Processing Traffic with Virtual Servers Path Load Balancing
Overview of SNATs
Using SNAT Pools
SNATs as Listeners
SNAT Specificity
VIP Bounceback
Additional SNAT Options

Chapter 7: Processing Traffic with SNATs Network Packet Processing **Chapter 8: Configuring High Availability**

Introducing Device Service Clustering (DSC)
Preparing to Deploy a DSC Configuration
Configuring DSC Communication Settings
Establishing Device Trust
Establishing a Sync-Failover Device Group
Synchronizing Configuration Data
Exploring Traffic Group Behavior
Understanding Failover Managers and Triggers
Achieving Stateful Failover with Mirroring

Chapter 9: Modifying Traffic Behavior with Profiles

Profiles Overview
TCP Profile Settings
TCP Express Optimization
Performance Improvements
Configuring and Using Profiles
HTTP Profile Options
OneConnect
Offloading HTTP Compression to BIG-IP
HTTP Caching
Stream Profiles
F5 Acceleration Technologies

VLAN, VLAN Tagging, and Trunking
Restricting Network Access

Chapter 10: Selected Topics SNMP Features

Simplifying Application Deployment with iApps
Using iApps Templates
Deploying an Application Service
Reconfiguring an Application Service

Chapter 11: Deploying Application Services with iApps Leveraging the iApps Ecosystem on DevCentral

Chapter 12: Customizing Application Delivery with iRules and Local Traffic Policies

Getting Started with iRules
Triggering an iRule
Introducing iRule Constructs
Leveraging the DevCentral Ecosystem
Deploying and Testing iRules
Getting Started with Local Traffic Policies
What Can You Do with a Local Traffic Policy?
How Does a Local Traffic Policy Work?
Understanding Local Traffic Policy Workflow
Introducing the Elements of a Local Traffic Policy
Specifying the Matching Strategy
What Are Rules?
Understanding Requires and Controls
Configuring and Managing Policy Rules
Configuring a New Rule
Including Tcl in Certain Rule Settings

About the Final Lab Project

Chapter 13: Final Lab Project Possible Solution to Lab 13.1

Audience

This course is intended for system and network administrators responsible for installation, setup, configuration, and administration of the BIG-IP LTM system.

Prerequisites

Students must complete one of the following F5 prerequisites before attending this course:

Administering BIG-IP instructor-led course
F5 Certified BIG-IP Administrator

The following free web-based courses, although optional, will be very helpful for any student with limited BIG-IP administration and configuration experience. These courses are available at F5 University:

Getting Started with BIG-IP web-based training
Getting Started with BIG-IP Local Traffic Manager (LTM) web-based training

The following general network technology knowledge and experience are recommended before attending any F5 Global Training Services instructor-led course:

OSI model encapsulation
Routing and switching
Ethernet and ARP
TCP/IP concepts
IP addressing and subnetting
NAT and private IP addressing
Default gateway
Network firewalls
LAN vs. WAN

The following course-specific knowledge and experience is suggested before attending this course:

Web application delivery
HTTP, HTTPS, FTP and SSH protocols
TLS/SSL

Session Dates

Date	Location	Time Zone	Language	Type	Guaranteed	PRICE
28 Aug 2024	Virtual Classroom (CET / UTC +1)	CEDT	English	Instructor Led Online		kr27,500.00
23 Oct 2024	Virtual Classroom (CET / UTC +1)	CEDT	English	Instructor Led Online		kr27,500.00
11 Dec 2024	Virtual Classroom (CET / UTC +1)	CET	English	Instructor Led Online		kr27,500.00
