Red Hat System Administration II

CODE:	LENGTH:	PRICE:
REH_RH134	32 Hours (4 days)	Request Price

Description

Red Hat System Administration II (RH134) is designed as the second part of the Red Hat® Certified System Administrator (RHCSA®) training track for IT professionals who have taken Red Hat System Administration I (RH124). The course goes deeper into core Linux® system administration skills, including storage configuration, security feature management, task control, and installation and deployment of Red Hat® Enterprise Linux.
This course is delivered as an on-site class, as online/video training or by virtual classroom.

Audience

This course is geared toward Windows system administrators, network administrators, and other system administrators who are interested in supplementing current skills or backstopping other team members, in addition to Linux system administrators who are responsible for these tasks:

• Configuring, installing, upgrading, and maintaining Linux systems using established standards and procedures
• Providing operational support
• Managing systems for monitoring system performance and availability
• Writing and deploying scripts for task automation and system administration

Prerequisites

Successful completion of Red Hat System Administration I (RH124) is recommended. Experienced Linux administrators seeking to accelerate their path toward becoming a Red Hat Certified System Administrator should start with the RHCSA Rapid Track course (RH199).

Programme

• Install Red Hat Enterprise Linux using scalable methods
• Access security files, file systems, and networks
• Execute shell scripting and automation techniques
• Manage storage devices, logical volumes, and file systems
• Manage security and system access
• Control the boot process and system services
