## Description

This two-day course gives VMware vRealize® Operations™ administrators the skills to perform basic troubleshooting tasks. The course also gives administrators the skills to ensure that their vRealize Operations instance meets its use-case objectives of continuous performance optimization, app-aware intelligent remediation, and integrated compliance. The hands-on training provides an overview of the tools and processes available to ensure a vRealize Operations deployment is running in a healthy state.

## Cel szkolenia

By the end of the course, you should be able to meet the following objectives:

- Identify the vRealize Operations components affected in typical troubleshooting scenarios
- List the environmental and operational factors that can generate problems in vRealize Operations
- Use self-monitoring tools to assess and troubleshoot operational issues in vRealize Operations
- Access CLI-based tools to assess and troubleshoot operational issues in vRealize Operations
- Use the vRealize Operations API tool to retrieve cluster data and perform actions
- Retrieve and review log files associated with specific vRealize Operations components
- Use available tools to troubleshoot problem scenarios in vRealize Operations
- Identify the best practices to ensure a vRealize Operations instance remains in a healthy state
- Locate resources to help you troubleshoot vRealize Operations

## Uczestnicy

System administrators tasked with maintaining a vRealize Operations cluster

## Wymagania wstępne

This class requires system administration experience with vRealize Operations deployments or completion of the following course:

- VMware vRealize Operations: Install, Configure, Manage [V8.2]

## Program szkolenia

- 1. Course Introduction**
  - Introduction and course logistics
  - Course objectives
- 2. Running a vRealize Operations Instance**
  - Identify the components of a vRealize Operations cluster
  - Identify common problems that affect vRealize Operations
  - List the environmental and operational factors that can affect vRealize Operations
  - Identify the affected components
- 3. vRealize Operations Troubleshooting Tools**
  - Use vRealize Operations self-monitoring tools to troubleshoot problems
  - Use CLI tools to troubleshoot vRealize Operations problems
  - Identify the log files used by individual vRealize Operations components
  - Run commands to analyze vRealize Operations log files
  - Use the vRealize Operations API tool
- 4. vRealize Operations Troubleshooting Scenarios**
  - Use relevant tools to troubleshoot problem scenarios

## **5. Maintaining vRealize Operations**

- Use best practices to ensure the vRealize Operations cluster remains in a healthy state
- Back up and restore vRealize Operations
- Identify vRealize Operations troubleshooting resources
