NetApp ONTAP Performance Administration

Kod:	Czas trwania:	Cena netto:
NEP_OT-PERFADM	24 Hours (3 days)	zł13,850.00

Description

Learn how to collect and analyze system performance data from NetApp® storage systems that run NetApp ONTAP® 9 software. You learn how to interpret data and how to identify and implement changes that improve system efficiency. You also learn how to use system commands and features to monitor and enhance storage system performance. You learn from hands-on exercises, case studies, and technical discussions.

Cel szkolenia

This course focuses on enabling you to do the following:

- Describe how to use NetApp tools for performance measurement
- Describe the layers within the ONTAP architecture
- Diagram the flow of read and write requests through the network and data layers of ONTAP software
- Discuss how storage quality of service (QoS) operates in an ONTAP cluster
- Explain how to monitor and manage workload performance
- Use the performance analysis tools to identify NAS and SAN performance obstacles

Uczestnicy

Administrators & Architects

Program szkolenia

Module 1: NetApp Storage System Architecture	<ul style="list-style-type: none">• FAS/AFF system architecture• Read and write paths• Performance concepts	Module 3: Performance Analysis Tools
Module 2: Performance Analysis Fundamentals	<ul style="list-style-type: none">• Workloads• Identifying network performance issues	Module 4: Network Layer
<ul style="list-style-type: none">• Performance analysis tools• Using Active IQ Unified Manager	<ul style="list-style-type: none">• Resolving network I/O performance issues	<ul style="list-style-type: none">• SAN overview• SAN multipathing• SAN load balancing• SAN I/O misalignment
Module 5: NAS Protocols	<ul style="list-style-type: none">• Network I/O bottlenecks• WAFL functions• WAFL readahead	Module 6: SAN Protocols
Module 7: WAFL Layer	<ul style="list-style-type: none">• Resolving WAFL performance issues	<ul style="list-style-type: none">• Queue depth• Storage subsystem hardware• Identifying storage performance issues
Module 9: Cache Subsystem	<ul style="list-style-type: none">• Cache sizing• Managing System Performance with QoS• Monitoring storage QoS• Performance service levels	Module 10: Storage Quality of Service
Module 12: External Resources	<ul style="list-style-type: none">• File access policies	<ul style="list-style-type: none">• CPU subsystem• Memory subsystem
		Module 11: CPU and Memory
		<ul style="list-style-type: none">• Resolving WAFL performance issues• Virus Scanning
