Description

The Symantec Asset Management Suite 8.5 Administration course is designed for professionals tasked with using Asset Management Suite (AMS) to manage their software and hardware resources in theirorganizations. This two-day, instructor-led, hands-on course teaches students the underlying components and
concepts of the Symantec Management Platform along with the Symantec Management Console that is used by AMS to perform its management functions. Students learn how to use AMS software solutions to manage their software, account for and track assets, and to manage license compliance. Students also learn how to use the platform consoles and reports to analyze and monitor their environment.
