Description

This course has now been replaced with the 4-day FortiGate Administrator course.

In this course, you will learn how to use the most common FortiGate features, including security profiles.

In interactive labs, you will explore firewall policies, the Fortinet Security Fabric, user authentication, and how to protect your network using security profiles, such as IPS, antivirus, web filtering, application control, and more.

These administration fundamentals will provide you with a solid understanding of how to implement basic network security.

Cel szkolenia

After completing this course, you will be able to:

- Deploy the appropriate operation mode for your network
- Use the GUI and CLI for administration
- Control network access to configured networks using firewall policies
- Apply port forwarding, source NAT, and destination NAT
- Authenticate users using firewall policies
- Understand encryption functions and certificates
- Inspect SSL/TLS-secured traffic to prevent encryption used to bypass security policies
- Configure security profiles to neutralize threats and misuse, including viruses, torrents, and inappropriate websites
- Apply application control techniques to monitor and control network applications that might use standard or non-standard protocols and ports
- Fight hacking and denial of service (DoS)
- Collect and interpret log entries
- Identify the characteristics of the Fortinet Security Fabric

Uczestnicy

Networking and security professionals involved in the management, configuration, administration, and monitoring of FortiGate devices used to secure their organizations' networks should attend this course.

You should have a thorough understanding of all the topics covered in the FortiGate Security course before attending the FortiGate Infrastructure course.

Wymagania wstępne

- Knowledge of network protocols
- Basic understanding of firewall concepts

Program szkolenia

Programme

1. Introduction and Initial Configuration
2. Firewall Policies
3. Network Address Translation
4. Firewall Authentication
5. Logging and Monitoring
6. Certificate Operations

- 7. Web Filtering
- 8. Application Control
- 9. Antivirus
- 10. Intrusion Prevention and Denial of Service
- 11. Security Fabric

Test and Certification

This course and the FortiGate Infrastructure course are intended to help you prepare for the NSE 4 certification exam:
