# Loading dashDB Tables Using CLPPLUS and REST API

**Kod:**            **Czas trwania:**            **Cena netto:**

K04007G      4 Hours                      zł1,500.00

## Description

This offering teaches cloud database support staff how to use the CLPPLUS and REST API command line tools to load data into a dashDB for Analytics or dashDB for Transactions database.

Note: Guided eLearning is a self-paced offering which includes web-based content for self study and videos (including audio) that demonstrate the hands-on activity.

If you are enrolling in a Self Paced Virtual Classroom or Web Based Training course, before you enroll, please review the Self-Paced Virtual Classes and Web-Based Training Classes on our Terms and Conditions page, as well as the system requirements, to ensure that your system meets the minimum requirements for this course. <http://www.ibm.com/training/terms>

## Cel szkolenia

Please refer to course overview

## Uczestnicy

Data Analysts or Data Administrators

## Wymagania wstępne

Knowledge of relational database fundamentals is required. Some experience creating relational database objects and load tables is recommended

## Program szkolenia

Selecting tools for loading data into dashDB tables Add a dashDB database connection for CLPPlus Creating dashDB database objects using CLPPlus Table organization for dashDB tables Table compression for dashDB tables Using the IMPORT command to load data in dashDB Using the LOAD command to load data in dashDB Using dashDB REST API to execute load processing for local data files LOAD recoverability and restart LOAD processing for row compressed tables Table statistics for newly loaded dashDB tables Loading a dashDB table directly from a query result Using database recovery history to review load processing
