# MB-500T00: Microsoft Dynamics 365: Finance and Operations Apps Developer

**CODE:**

MCS\_MB-500T00

**LENGTH:**

40 Hours (5 days)

**PRICE:**

kr43,000.00

**Description**

Developer training. Microsoft Dynamics 365 Finance and Operations Apps Developers implement and extend applications to meet the requirements of the business. Candidates provide fully realized solutions by using standardized application coding patterns, extensible features, and external integrations.

**Audience**

Microsoft Dynamics 365 Finance and Operations Apps Developers

**Programme****Module 1: Overview & Architecture**

Describe the Dynamics 365 ecosystem and major components of the Dynamics 365 Finance and Operations (FO) software, describe the architecture of D365FO, describe relevant D365FO design and deployment considerations

**Lessons**

- Explore the ecosystem and main components
- Explore the technical architecture
- Explore design and deployment considerations

Lab : Development Environment configuration and Project/Model Creation

**Module 2: Developer Tools**

Manage system implementations by using Lifecycle Services, Customize D365FO by using Visual Studio, Manage source code and artifacts by using version control, Work with other development tools to complete tasks

**Lessons**

- Manage implementations by using Lifecycle Services
- Manage source code by using version control
- Customize by using Visual Studio

Lab : Source Control using DevOps

**Module 3: Solution Design**

Determine the required application stack components and server architecture, Implement Application Lifecycle Management (ALM), Design a solution for D365FO

**Lessons**

- Implement application lifecycle management

Lab : Data Structure Development

**Module 4: AOT Elements**

Create forms, Create and extend tables, Create Extended data Types (EDT) and enumerations, Create classes and extend AOT elements

**Lessons**

- Build extended data types and enumerations
- Build tables
- Build forms and optimize form performance
- Create classes
- Create other user interface elements

Lab : Metadata Extension & Development

## Module 5: Code Development & Testing

Develop X++ code, Develop object-oriented code, Extend D365 FO functionality, Describe test framework and tools, Perform Unit Testing

### Lessons

- Explore the test framework and use tools
- Get started with development using X++
- Develop object-oriented code
- Use RSAT tool

Lab : Code Extension & Development

## Module 6: Data Migration

Describe migration tools and methodologies, Plan Migration strategy, Prepare data for migration and migrate data

### Lessons

- Prepare data for migration

Lab : Data Export/Import using Data Entity

Lab : Recurring Data Transfer

## Module 7: Frameworks

Implement D365 FO functionality

### Lessons

- Introduction
- Explore extensions and the extension framework
- Extend elements
- SysOperationSandbox framework
- Summary

Lab : SysExtension Framework

## Module 8: Integration

Identify Data integration patterns and scenarios, Implement Data integration concepts and solutions, Implement Recurring integrations, Integrate D365FO with Microsoft Azure, Troubleshoot integration errors, Implement the Data Management Package API

### Lessons

- Identify data integration patterns and scenarios
- Implement data integration concepts and solutions
- Implement the data management package API
- Data integrations
- Integrate with Microsoft Azure
- Connecting to Power Platform services
- Consume business events
- Integrate Finance and Operations apps with Microsoft Dataverse

Lab : OData Integration

Lab : Logic App Integration

Lab : Calling an External Web Service

## Module 9: Reporting

Describe the capabilities and limitations of reporting tools in D365FO, Design, create, and revise Dynamics Reports, Design, create, and revise Dynamics workspaces, Design, create, and revise data sources that connect to data stores external to D365FO

### Lessons

- Explore the reporting tools
- Build reports
- Build workspaces
- Manage data sources with external data stores

Lab : Power BI reporting from F&O

## Module 10: Security & Performance

Describe and implement performance tools and LCS Environment Monitoring tools, Implement role-based security policies and requirements, Apply fundamental performance optimization techniques, Optimize performance for batch processes, Optimize user interface performance, Enhance Integration performance, Optimize Report Performance

### Lessons

- Work with performance and monitoring tools
- Implement role-based security
- Apply basic performance optimization techniques

Lab : Async & Sandbox Functionality

## Session Dates
