# **NSE 6 - FortiSOAR Administrator**

<b>CODE:</b>	<b>LENGTH:</b>	<b>PRICE:</b>
FNT_FT-FSR-ADM	16 Hours (2 days)	Request Price

## **Description**

In this course, you will learn about FortiSOAR architecture, and how to deploy, configure, manage, operate, and monitor FortiSOAR in a SoC environment. You will learn about various system customization options, HA deployment, security management using role-based access control (RBAC), and various system monitoring tools.

Product Versions:

- FortiSOAR 7.3.0

## **Objectives**

After completing this course, you should be able to:

- Identify challenges of security teams, and assist security teams with SOAR best practices
- Identify the role of SOAR in assisting security teams
- Describe the basics of SOAR technology
- Manage licenses
- Deploy and manage a FortiSOAR VM
- Configure teams, roles, and users
- Configure authentication
- Schedule the purging of audit logs and executed playbook logs
- Configure playbook recovery
- Configure environment variables
- Configure company branding
- Configure system fixtures
- Configure the recycle bin
- Monitor and manage audit logs
- Use the configuration manager
- Monitor system resources
- Deploy, configure, manage, and troubleshoot a FortiSOAR high availability cluster
- Identify the types of logs used for troubleshooting
- Collect log files used for troubleshooting
- Troubleshoot key services and processes on FortiSOAR

## **Audience**

This course is intended for cybersecurity professionals responsible for planning, deploying, configuring, and managing FortiSOAR deployments in a SOC environment.

## **Prerequisites**

You must have an understanding of the topics covered in the following course, or have equivalent experience:

- You must have an understanding of the topics covered in FCP - FortiGate Security, or have equivalent experience.
- Familiarity with SOC technologies and processes is recommended.

## **System Requirements**

If you take the online format of this class, you must use a computer that has the following:

- A high-speed Internet connection
- An up-to-date web browser
- A PDF viewer
- Speakers or headphones
- One of the following:
  - HTML 5 support
- An up-to-date Java Runtime Environment (JRE) with Java Plugin enabled on your web browser

You should use a wired Ethernet connection, not a WiFi connection. Firewalls, including Windows Firewall or FortiClient, must allow connections to the online labs.

## Programme

1. Introduction to FortiSOAR
2. Device Management
3. High Availability
4. System Configuration
5. Searching and Upgrading
6. System Monitoring and Troubleshooting

## Test and Certification

Exam:

This course prepares you for the Fortinet NSE 6 - FortiSOAR 7.3 Administrator exam. By passing this exam, you will be awarded the associated exam badge.

Certification:

This exam is part of the FCP Security Operations certification track.
