NetApp   ONTAP Advanced Performance Analysis

CODE:	LENGTH:	PRICE:
NEP_OT-APA	16 Hours (2 days)	kr24,000.00

Description

Learn how to diagnose performance issues within NetApp® ONTAP® based storage systems. Practice using NetApp and third-party tools to analyze ONTAP based storage system performance and identify any constraints. Then discuss ways to mitigate and alleviate such constraints.

Objectives

This course focuses on enabling you to do the following:
• Identify the ONTAP service centers in the ONTAP system architecture that can affect performance
• Use efficient methods to troubleshoot any ONTAP performance issues
• Examine each ONTAP service center for excessive latency
• Remedy ONTAP performance constraints

Audience

Administrators and Operators

Prerequisites

• ONTAP Cluster Administration
• ONTAP Performance Administration

The instructor led courses above are required.

Programme

Module 1:NetApp storage system architecture

Lessons
• FAS and AFF system architecture
• ONTAP service centers

Exercises
Analyzing ONTAP service center delays

Module 2: Performance troubleshooting methods
Lessons
• Performance troubleshooting methodology
• Problem determination
Exercises
Creating baseline performance measurements

Module 3: Analyzing ONTAP performance
Lessons
• Analyzing network component performance
• Analyzing SCSI component performance
• Analyzing CSM performance
• Analyzing data component performance

• Analyzing disk performance
• Analyzing QoS performance
• Analyzing cloud performance
• Analyzing FPolicy performance
Exercises
Analyzing ONTAP performance
