## Description

This five-day course, which is designed to build off the current Junos Security (JSEC) offering, delves deeper into Junos security and next-generation security features. Through demonstrations and hands-on labs, you will gain experience in configuring and monitoring the advanced Junos OS security features with advanced coverage of virtualization, AppSecure, advanced logging and reporting, next generation Layer 2 security, user firewall, next generation advanced anti-malware with Sky ATP, next generation security intelligence with software-defined secure networks. This course uses Juniper Networks SRX Series Services Gateways for the hands-on component.
This course is based on Junos OS Release 15.1X49-D90.7 and Junos Space Security Director 16.2.
