## Description

This three-hour course is for power users who want to improve search performance. Topics will cover how search modes affect performance, how to create an efficient basic search, how to accelerate reports and data models, and how to use the `tstats` command to quickly query data.

## Objectives

- Optimizing Search
- Report Acceleration
- Data Model Acceleration
- Using the `tstats` Command

## Audience

Search Experts Knowledge Managers

## Prerequisites

To be successful, students should have a solid understanding of the following:

- How Splunk works
- Creating Search queries
- Creating reports and data models

## Programme

Topic 1 – Optimizing Search

- Understand how search modes affect performance
- Examine the role of the Splunk Search Scheduler
- Review general search practices

Topic 2 – Report Acceleration

- Define acceleration and acceleration types
  - Understand report acceleration and create an accelerated report
  - Reveal when and how report acceleration summaries are created
  - Search against acceleration summaries
- Topic 3 – Data Model Acceleration

- Understand data model acceleration
  - Accelerate a data model
  - Use the datamodel command to search data models
- Topic 4 – Using the tstats Command

- Explore the tstats command
- Search acceleration summaries with tstats
- Search data models with tstats
- Compare tstats and stats

## Further Information

Individuals who enroll in this class will also be enrolled in an (eLearning with Labs) component. Completion of labs and quizzes is required in order to receive proof of completion.
