Guardium Data Protection - Uncovering threats (v11.4)

CODE: 8G910XG **LENGTH:** 4 Hours **PRICE:** £460.00

Description

IBM Security Guardium provides a broad range of data security and protection capabilities that can protect sensitive and regulated data across environments and platforms. This course provides the foundational level processes, procedures, and practices necessary to locate databases and data, discover vulnerabilities, and automate the compliance process. This course is a subset of the 3-day course, IBM Security Guardium Data Protection Foundations. Administrators who need in-depth Guardium training should enroll in 8G102G, which is instructor led, or 8G102XG, which is self paced.

Objectives

- Discover databases and sensitive data
- Perform a vulnerability assessment
- Use Guardium audit process tools to streamline the compliance process

Audience

- Database Administrators
- Security Administrators
- Security Analysts

Programme

- Guardium discovery & vulnerability assessment
- Audit process automation
