IBM Safer Payments Case Management Training (V6.6)

CODE:	LENGTH:	PRICE:
6A642G	16 Hours (2 days)	€1,560.00

Description

IBM Safer Payments is an enterprise fraud detection solution. It is designed and focused on real time payment transaction processing. Safer Payments provides complex and dynamic rules building, evaluation and execution. Built with real time performance, management, and redundancy in mind.

In this course, IBM Safer Payments' case management capabilities are presented in detail. Students will learn how to configure and customize the built-in case management, and the workflow and activities involved when investigating cases.

Objectives

- Mandator structure
- Queries
- Case Management Concept
- Workflows
- Case configuration
- Working Queues
- Case investigation
- Fraud Marking
- Risk Lists
- Case Actions and External Queries
- Reporting

Audience

- External: Fraud Analysts and Investigators, Application and System Administrators who manage Safer Payments (optional)
- Internal: IBM Lab Services, IBM Support, IBM Technical Pre-Sales and IBM Business Partners
