# Migration from VMware NSX for vSphere to NSX-T

CODE:	LENGTH:	PRICE:
VMW_NSXTVS32	24 Hours (3 days)	£2,110.00

## Description

This three-day, hands-on training course provides you with the skills, techniques, and tools required to successfully migrate your current VMware NSX® Data Center for vSphere® environment to VMware NSX-T™ Data Center.

You will learn to choose between different migration approaches and how to perform the type of migration that best suits your current environment.

In addition, you are presented with common migration problems and resolutions.

## Objectives

**By the end of the course, you should be able to meet the following objectives:**

- Contrast NSX-T Data Center and NSX Data Center for vSphere architectures
- Understand the networking and security features of NSX-T Data Center
- Compare end-to-end and lift-and-shift migration approaches
- Identify common fixed network topologies supported in end-to-end migrations
- Perform end-to-end migrations for fixed and user-defined topologies
- Describe other migration modes supported by the migration coordinator
- Describe lift-and-shift migration techniques
- Troubleshoot common problems with end-to-end and lift-and-shift migrations
- Describe the steps to perform a cross-vCenter NSX to NSX Federation migration

## Audience

- Experienced System Administrators and Network Administrators
- Network and Security Professionals who work with enterprise and data center networks

## Prerequisites

**Before taking this course, you must complete the following course:**

VMware NSX-T Data Center: Install, Configure, Manage V3.2 **You should also have understanding or knowledge of these technologies**

- Good understanding of TCP/IP services and protocols
- Knowledge and working experience of computer networking and security, including:
  - o Switching and routing technologies (L2 and L3)
  - o Network and application delivery services (L4 to L7)
  - o Firewalling (L4 through L7)
  - o VMware vSphere® environments

**The VMware Certified Professional – Network Virtualization certification is recommended**
