VMW_VROAUC8	16 Hours (2 days)	£1,410.00

Description

This two-day hands-on training course provides advanced knowledge, skills, and tools to achieve competency in operating VMware vRealize® Operations™ 8.X.

This course explains the design and creation of advanced dashboards, capacity concepts, and the REST API with real-world use cases.

Objectives

By the end of the course, you should be able to meet the following objectives:

- Use the applications to group objects
- Create the logical groups of objects in the vRealize Operations environment
- Create and design advanced dashboards
- Discuss about widget and its settings
- Define a vRealize Operations policy
- Outline the components of a vRealize Operations policy
- Create the custom alerts
- Describe the troubleshooting workbench
- Review the advanced capacity concepts
- Discuss the what-if analysis scenarios
- Describe how to integrate vRealize Operations with VMware vRealize® Suite products
- Import the VMware vRealize® Network Insight™ applications
- Describe the super metrics use cases
- Outline the vRealize Operations REST API architecture
- Discuss the vRealize Operations traversal spec
- Create and query objects using the REST API

Programme

1 Course Introduction		2 Custom Groups and Applications	
<ul style="list-style-type: none"> • Introduction and course logistics • Course objectives 		<ul style="list-style-type: none"> • Outline the use cases for custom groups • Create the custom groups • Assign the objects to custom groups • Identify the use cases for applications • Create the custom applications • Identify the vRealize Network Insight applications 	
3 Custom Dashboard Design		4 Custom Policies	
<ul style="list-style-type: none"> • Design the dashboards • Discuss the types of widgets and widget's settings • Select the widgets based on the scenario • Explain the advanced dashboards • Discuss the use cases of dashboards 		<ul style="list-style-type: none"> • Outline the components of a vRealize Operations policy • Review the policies applied to the objects in vRealize Operations • Outline how the policy hierarchy is implemented • Design a vRealize Operations Policy • Understand how a policy supports the business objectives 	
5 Alerts, Symptoms and Troubleshooting workbench		6 Capacity Models and What-if Scenarios	
<ul style="list-style-type: none"> • Identify the use case for custom alerts and symptoms • Create the custom alerts and symptoms • Access the troubleshooting workbench feature • Use the troubleshooting workbench feature to identify problems • Outline the metric correlation options in vRealize Operations 		<ul style="list-style-type: none"> • Review the capacity planning concepts • Describe the demand based and allocation-based model • Discuss the use cases of capacity models • Discuss the use cases of what-if analysis scenarios 	

7 vRealize Operations integration

- Integrate vRealize Operations with products in vRealize Suite
- Identify the advantages of integrating vRealize Operations with vRealize Log Insight
- Import the vRealize Network Insight applications
- Configure the integration with vRealize Automation

8 Super Metrics

- Create super metrics
- Explain the depth value
- Discuss the use cases of super metrics

9 vRealize Operations REST API

- Outline the REST API architecture
- Navigate the REST API landing page
- Discuss the Swagger response codes
- Explain the vRealize Operations traversal specification
- Create and query objects using the REST API
- Discuss some of the examples of the REST API

Session Dates

Date	Location	Time Zone	Language	Type	Guaranteed	PRICE
10 Jun 2024	Virtual Classroom	BST	English	Instructor Led Online		£1,410.00
09 Sep 2024	Virtual Classroom	BST	English	Instructor Led Online		£1,410.00
02 Dec 2024	Virtual Classroom	GMT	English	Instructor Led Online		£1,410.00
