## Description

Design and develop document templates in RPE (old/new product naming). Generate documents from templates and data from supported applications. Focus on modular design, reusability and formatting strategy.

## Objectives

• Explain key concepts and terminology
• Explain the architecture and key components
• Create and format templates
• Generate document-style reports
• Use data schemas
• Define data sources
• Use dynamic binding for accessing data
• Create document specifications
• Use conditions for filtering data

## Audience

• Project Support Teams
• Report Designers & Developers
• System & Software Engineers

## Prerequisites

It would be useful to have the skills or experience as below..

• Understanding of basic programming constructs
• Basic understanding about XML files and schema definitions

## Programme

• About this course
• Key concepts and terminology
• Product overview
• Architecture
• Creating templates
• Formatting
• Data schemas and data sources
• Dynamic binding
• Document specifications
• Using RPE templates from CLM-ELM
• Best practices

## Session Dates
