Designing Software Deployment with UrbanCode Deploy

CÓDIGO:	DURACIÓN:	Precio:
CQ410G	8 Hours (1 dia)	€650.00

Description

This course teaches you how to use IBM UrbanCode Deploy to standardize and simplify the process of deploying software components to each environment in your development cycle.

In this course, you learn how to configure IBM UrbanCode Deploy for the deployment of a pet store application to two different environments. You create resources and versioned components, configure the environments, and deploy the application. You also create teams and roles and learn the fundamentals of security.

Hands-on labs use IBM UrbanCode Deploy and cover components, applications, resources, deployment, and security.
