# Commvault Engineer – CommCell Console

CODE:	LENGTH:	PRICE:
COM_AID	24 Hours (3 days)	€2,160.00

## Description

Learn how to plan, configure, and deploy Commvault to support your data protection needs with the simplicity and elegance of Commvault's Command Center. Start with an overview of the CommCell environment and architecture and data indexing processes as essential components for effective backup and recovery. You will then learn about options for storage design for single and hybrid recovery types, how data is marked and stored, how to leverage deduplication to scale effectively, and how to configure and manage plans to avoid overloading your bandwidth. The next topics cover the protection of virtual environments and applications, followed by IntelliSnap technology to support fast and effective backups. The course concludes with guidance on performance management.

## Audience

Who should take this course?

- Experienced Commvault users who are responsible for design and architecting data protection solutions
- Systems engineers and architects responsible for designing, implementing, and managing one or more Commvault environments
- Security officers responsible for strategically planning data protection with Commvault

## Training Development

- This course is available as a 3-day Virtual Instructor-Led or Instructor-Led training.

## Prerequisites

It is required to have attended either:

- Version 10 Core Fundamentals and Implementation and Maintenance courses along with the V11 New Features course or
- Version 11 Core Fundamentals and Implementation and Maintenance course.

## Programme

<b>Module 1: CommCell® Environment Design</b> CommCell design CommServe® design MediaAgent scaling Indexing scaling	<b>Module 2: Storage Design</b> Storage infrastructure design GridStor® technology SAN Data Server Cloud computing and storage Deduplication design Storage Policy design	<b>Module 3: Virtualization</b> Virtualization primer Virtual Server Agent backup process Virtual Server Agent roles Transport modes Virtual Server Agent configuration
	<b>Module 5: Application Protection</b> Application protection overview Agent based protection VSA application aware backup IntelliSnap for VSA Additional application protection methods	
<b>Module 4: IntelliSnap® Technology</b> IntelliSnap technology overview Hardware snapshot methods IntelliSnap for VSA IntelliSnap configuration		

## Module 6: Performance

- Performance overview
- Meeting backup windows
- Meeting media management requirements
- Meeting restore requirements
- Assessing data protection methods
- Assessing Commvault® product features
- Assessing Commvault software options and configurations

## Test and Certification

Completion of this course helps you prepare for the Commvault Engineer – Command Center Exam Certification. The Commvault Certified Engineer – Command Center is included free of charge as a part of the Commvault Engineer – Command Center instructor and virtual instructor-led course registration. To achieve Commvault Engineer – Command Center Certification you must first complete the Commvault Professional Certification.

## Session Dates

Date	Location	Time Zone	Language	Type	Guaranteed	PRICE
14 May 2024	Virtual Classroom (CET / UTC+1)	CEDT	English	Instructor Led Online		€2,160.00
03 Sep 2024	Virtual Classroom (CET / UTC+1)	CEDT	English	Instructor Led Online		€2,160.00
22 Oct 2024	Virtual Classroom (CET / UTC+1)	CEDT	English	Instructor Led Online		€2,160.00
18 Dec 2024	Virtual Classroom (CET / UTC+1)	CET	English	Instructor Led Online		€2,160.00
