Test and Certification

CCSA - Check Point Certified Security Administrator (exam: 156-215.80)
The CCSA is the entry level of certification to show that you have the skills to install Check Point's best-known product, the FireWall-1, to help protect your corporate network. You are also able to define and implement security guidelines, so that secure access to company information is guaranteed.
CCTA - Check Point Certified Troubleshooting Administrator (exam: 156-580)
With the CCTA certification you show the understanding of the concepts and skills necessary to troubleshoot issues which may occur when managing the Check Point Security Management architecture and Security Gateways.

After attending the two courses, you will receive two test vouchers, which you can use to register for the CCSA & CCSE certification exams at a Pearson Vue Test Center.

Further Information

Our certification package includes the following services:

- Full board (cold / warm drinks, snacks and fruit in the breaks, lunch including drinks)

- Original Check Point courseware

- Two Test vouchers

- Bundle price info in comparison to single course order
