## Description

The Symantec Web Security Service Planning, Implementation, and Administration course is intended for IT professionals who will be planning, installing, configuring or administering the Symantec Web Security Service (WSS).

## Cel szkolenia

- Describe the architecture, components and process flow of WSS
- Identify installation, configuration and administration of the core features and products of WSS.
- Identify the key elements for planning a WSS deployment

## Wymagania wstępne

- Working knowledge of cloud based solutions
- Knowledge of internet traffic protocols
- Basic understanding of principles of authentication.

## Program szkolenia

**Module 1: Cloud Delivered Security**

- What is Cloud Delivered Security
- What are the Key Considerations for Having Cloud Delivered Security
- What are the Key Features Needed for Cloud Delivered Security

**Module 2: Web Security Service Connection Architecture and Functionality**

- WSS Infrastructure
- WSS Connection Architecture
- WSS Features
- WSS Additional Products

**Module 3: Getting Started with WSS**

- Initial Registration
- User Administration
- Licensing
- Data Privacy Settings

**Module 4: Enable Remote Users to Securely Access the Internet**

- Remote Users and Solutions
- WSS Agent Access Method
- WSS-SEP Access Method

- Cloud Connect Defense (CCD) Access

**Module 5: Provide Safe and Proper Web Usage Based on User Identity**

- Authentication and WSS
- Auth Connector
- SAML
- Remote Authentication Methods with Auth Connector
- Authentication with WSS Agent and WSS-SEP Access Methods

**Module 6: Create a more Effective Work Environment for Employee Web Usage**

- Configure Content Filtering Rules to Determine Internet Usage
- Setting Global Content Filtering Policy Rules
- Creating Custom Response Pages
- Universal Policy Enforcement

**Module 7: Providing Web Protection Against Malware**

- WSS Threat Protection
- Malware Analysis and WSS
- Threat Protection Policies
- Creating Threat Protection Policy Rules

**Module 8: Enable Encrypted Traffic Inspection**

- Encrypted Traffic
- SSL Configuration
- Configuring SSL Exceptions

**Module 9: Enable Corporate Users to Securely Access the Internet**

- Firewall/VPN (IPsec) Access Method
- FQDN-IKEv2 Firewall Access Method
- Cert-Based Connection Access Method
- TransProxy (Explicit Proxy Over IPsec) Access Method
- Proxy Forwarding Access Method

**Module 10: Identify Web Usage and Security Statistics with Reports**

- Reports Overview
- Pre-defined Reports
- Simple Reporting
- Custom Reporting
- Forensic Reporting
- Managing and Using Reports

**Module 11: Enable Mobile Users to Securely Access the Internet**

- About Mobile Device Security
- Authentication for Mobile Users
- SEP-Moblie Solution
- Android Mobile Access Enrollment Process

**Module 12: Course review**

- Assessment of Needs
- Design – Access Methods and Authentication
- Design – Policy, Reporting and Threat Protection
- Design Evaluation
