IBM **InfoSphere Optim Data Growth for Archiving on z/OS**

CODE:	**LENGTH:**	**PRICE:**
ZL1_1T802	32 Hours	kr3,990.00

Description

The IBM Optim Data Growth for z/OS course is designed to enable the students to successfully develop and execute an archiving strategy. This course provides a conceptual understanding of the data growth issue, as well as the Optim Solution's capabilities for managing data growth and improving the performance of critical business applications. This course serves as a foundation for the Optim Solution's features and functionality.

This course focuses on the technical aspects of the Optim Solution and is intended for technical audiences. Participants will learn the basics of how the technology works, and how the technology applies to business scenarios. This course does not include information on how to install and configure the technology. This course prepares technical users with the Optim knowledge and skills necessary to participate in an Optim archive implementation project and confidently perform Optim tasks ongoing.

Training Paths that reference this course are:

- InfoSphere Optim
- Optim Custom Solutions for z/OS – Administrator
- InfoSphere Optim

If you are enrolling in a Self Paced Virtual Classroom or Web Based Training course, before you enroll, please review the **Self-Paced Virtual Classes and Web-Based Training Classes** on our Terms and Conditions page, as well as the system requirements, to ensure that your system meets the minimum requirements for this course.

Objectives

- Successfully archive and delete eligible data from a production database
- Select the correct relationship traversal options for your data model
- Choose the appropriate type of storage for your archived data
- Choose the most effective method for your business users to locate and view archived data
- Restore archived data, if required
- Define Optim Relationships and Primary Keys, if needed
- Export and Import Optim Directory objects
- Identify the factors that affect Optim performance

Audience

This basic course is for Archive Project Leaders and project team members, who will be responsible for implementing and executing an archiving strategy for one or more applications. This would include application developers, business analysts, and DBAs who have been assigned to your archiving project.

Prerequisites

You should have a working knowledge of:

- DB2 **and** relational database concepts
- DB2 SQL basics
- TSO/ISPF editing commands **and** job output retrieval functions

Programme

- Introduction to IBM InfoSphere Optim Solutions
- The Optim Directory
- Introduction to Archiving
- The Archive Process
- Delete Archived Data
- Retry/Restart an Optim Process
- Create Database Objects
- Full Restore of Archived Data
- Search for Archived Data
- View Archived Data
- Selective Restore of Archived Data
- Optim Primary Keys and Relationships
- Relationship Traversal Concepts
- Export and Import Optim Directory Objects
- Batch Utilities
- Optim Security Overview
- Monitor Your Archive Strategy
- Performance Considerations
