# Commvault Implementation and Maintenance

CODE:	LENGTH:	PRICE:
COM_IM	16 Hours (2 days)	€1,440.00

## Description

Advance your Commvault expertise with a review of the Next Generation feature enhancements to Commvault software. Sharpen your skills with a technical overview of architectural considerations, resource planning requirements, and installation options for deploying Commvault solutions. Students will learn configuration Best Practices and performance-enhancement techniques, as well as troubleshooting tools and processes that can help identify causes of and solutions for common problems. The Implementation and Maintenance course is intended for operations and administrative personnel responsible for ongoing configuration of Commvault software and troubleshooting. It can be delivered in combination with our 3-day Core Fundamentals course.

## Objectives

The Commvault® Implementation and Maintenance Certification Exam assesses the student's level of comprehension for:

- Planning and designing a data management solution.
- Installation requirements and best practices for software components and libraries.
- Effective and proper use of available tools for identifying and resolving problems and performance.
- Identification of performance issues and options to improve performance.
- Understanding of common problems and solutions, and the methodology for identifying and resolving problems that may occur.

## Prerequisites

- Welcome to Commvault® eLearning course must be completed
- Attending the Core Fundamentals course is recommended

## Programme

### Designing a CommCell® Environment

- Next Generation Platform Overview
- Storage Platform
- Data Protection Planning
- Virtual Environment Data Protection Design

### CommCell® Deployment and Configuration

- CommCell Deployment Process
- Client Agent Deployment Methods

### Data Security and Network Control

- Network Control
- Firewall Configuration
- Data Encryption

## Performance Tuning

- Performance Primer
- Stream Management

## Session Dates
