### Description

## Certification Program

Commvault's Certification Program validates expertise and advanced knowledge in topics, including Commvault Professional, Engineer and Master-level technologies. Certification is a valuable investment for both a company and the IT professional. Certified personnel can increase a company's productivity, reduce operating costs, and increase potential for personal career advancement. Commvault's Certification Program offers Professional-level, Engineer-level, and Master-level certifications. This Program provides certification based on a career path, and enables advancement based on an individual's previous experience and desired area of focus. It also distinguishes higher-level certifications such as Engineer and Master from lower-level certification as a verified proof of expertise.

### Commvault® Certification Program

### Key Points

- Certification is integrated with and managed through Commvault's online registration in the Education Advantage Customer Portal.
- Cost of certification registration is included in the associated training course.
- Practice assessments are available at [ea.commvault.com](https://ea.commvault.com).
- Upgrade exams are available for anyone holding a V10 certification.
- Update exams are required at least every two years and are strongly recommended.
- Certification status requires passing one or more exams.
- Students may take the online certification exam any time after completing the course.
- Although it is recommended to attend training prior to attempting an exam, it is not required.
