ONTAP 9.7 Data Protection Administration (24 Training Units)

NetApp

CODE:	LENGTH:	PRICE:
NEP_OT-DPA 9.7	16 Hours (2 days)	£1,536.00

Description

This course introduces some of the key concepts and techniques for protecting data on NetApp® ONTAP® systems. You learn about the different data protection solutions that are integrated in ONTAP software. You also learn about the tools for managing ONTAP data protection features. In the hands-on exercises, you use ONTAP System Manager and the CLI to execute key data protection tasks. This course is updated for ONTAP 9.7.

Objectives

This course focuses on enabling you to do the following:

• Describe the data protection features in ONTAP software
• Configure SnapMirror® relationships for data replication
• Demonstrate storage virtual machine disaster recovery (SVM DR)
• Explain MetroCluster™ components and configuration
• Configure the SnapVault® feature for disk-to-disk backup and recovery
• Describe NDMP-enabled operations to back up NAS data to tape storage
• Describe the NetApp SnapCenter® software that is used for ONTAP data protection management
• Explain cloud-based data protection with NetApp Cloud Volumes ONTAP

Prerequisites

• ONTAP Cluster Administration (three-day instructor-led course)
• ONTAP Data Protection Fundamentals (eLearning)

Session Dates

On request. Please Contact Us
