Introduction into the IBM DB2 Analytics Accelerator - Handling Tables

CODE:	LENGTH:	PRICE:
1V500G	4 Hours	kr1,785.00

Description

Contains: instructional and interactive content, demonstrations and hands-on simulated exercises.

This web based course provides training in the basics of the IBM DB2 Analytics Accelerator. The course introduces the student to the product layout and functionality and describes the various ways of storing DB2 data in IBM DB2 Analytics Accelerator. In addition to IBM DB2 Analytics Accelerator, it will also teach the student how to set up and work with the IBM Data Studio Accelerator Suite. The demonstrations will explore how tables can be loaded into IBM DB2 Analytics Accelerator, how to predict if tables could run on the accelerator using special register settings, why queries may not be candidates for the accelerator, how to disable or remove tables from the Accelerator, and finally, demonstrate the monitoring feature that is built-into the accelerator studio view.

If you are enrolling in a Self Paced Virtual Classroom or Web Based Training course, before you enroll, please review the Self-Paced Virtual Classes and Web-Based Training Classes on our Terms and Conditions page, as well as the system requirements, to ensure that your system meets the minimum requirements for this course. <http://www.ibm.com/training/terms>

Objectives

Please refer to course overview

Audience

DB2 for z/OS customers looking at speeding up their analytics applications

Prerequisites

Participants should have the following skills: Basic knowledge on DB2 for z/OS

Programme

Topics Covered: Introduction to the concepts of the IBM Analytics Accelerator Demonstration on how to get tables into the Accelerator Running queries on the accelerator Problem Determination basics demonstration
