IBM SPM Design System for Designers

CODE:	LENGTH:	PRICE:
9D79G	0.88 days	\$700.00

Description

The course explains the importance of design in the development of usable web apps and digital services. It also places the importance of design in the context of governments in Canada, the U.K., and U.S. setting up national web design systems. The course also introduces the IBM Design Thinking framework and the IBM SPM Web Design System.

If you are enrolling in a Self Paced Virtual Classroom or Web Based Training course, before you enroll, please review the Self-Paced Virtual Classes and Web-Based Training Classes on our Terms and Conditions page, as well as the system requirements, to ensure that your system meets the minimum requirements for this course. <http://www.ibm.com/training/terms>

Objectives

After completing the course, learners will be able to:

- Explain the purpose of government web design systems.
- State general design guidelines, including accessibility and theming.
- Provide an overview of IBM Design Thinking.
- Identify the components in the IBM Social Program Management (SPM) Design System
- Interpret guidelines for using IBM Web Design System components

Audience

This course is intended for a mixed audience includes business analysts (BA), Developers, and Graphic Designers who will work on SPM implementation projects that use the IBM SPM Web Design System. For BAs who find themselves tasked with design work, it will provide the background information that they need on design and how essential it is to application development. For Developers, it introduces them to basic design concepts and IBM Design Thinking. Graphic Designers will also benefit from an introduction to IBM Design Thinking and the structure and contents of the IBM SPM Web Design System.

Prerequisites

Basic Knowledge of IBM Design Thinking (Recommended).

Programme

This course introduces the learner to the following topics:

- The increasing importance of design in the development of digital services and web apps
- The related introduction of national web design systems
 - The layout and contents of the U.S. Web Design System
- The IBM Design Thinking framework
- The IBM Social Program Management (SPM) Web Design System

Further Information

This course examines the importance of design in the development of web apps and digital services that provide a useful and positive user experience. The course explores some general design concepts and principles and discusses how they underpin government web design systems. The course also introduces the IBM Design Thinking Framework and the IBM SPM Web Design System.

Prior to enrolling, IBM Employees must follow their Division/Department processes to obtain approval to attend this public training class. Failure to follow Division/Department approval processes may result in the IBM Employee being personally responsible for the class charges.

GBS practitioners that use the EViTA system for requesting external training should use that same process for this course. Go to the EViTA site to start this process:

<http://w3.ibm.com/services/gbs/evita/BCSVTEenrl.nsf>

Once you enroll in a GTP class, you will receive a confirmation letter that should show:

- The current GTP list price
- The 20% discounted price available to IBMers. This is the price you will be invoiced for the class.

Session Dates

Date	Location	Time Zone	Language	Type	Guaranteed	PRICE
13 Aug 2022			English	Self Paced Training		\$300.00
