# IBM Sterling Configure, Price, Quote 9.5 Sterling Configurator Visual Modeler Fundamentals

CODE:	DURÉE:	PRIX H.T.:
6F103G	16 Hours	€600.00

## Description

If you are enrolling in a Self Paced Virtual Classroom or Web Based Training course, before you enroll, please review the Self-Paced Virtual Classes and Web-Based Training Classes on our Terms and Conditions page, as well as the system requirements, to ensure that your system meets the minimum requirements for this course. <http://www.ibm.com/training/terms>

This course is a 2-day self-paced virtual course introduces you to the fundamentals of the Sterling Configurator Visual Modeler application. The student is introduced to the omni-configurator which is a significant feature of the Sterling Configure Price Quote v9.5.

You are introduced to the Sterling Configurator Visual Modeler application, its architecture, and the proposed integration with external systems. You are then introduced to the basic concepts such as, model groups, models, option class, option items, and option groups.

Further into the course, you will learn about concepts such as, Properties, Lists, Rules and Constraints, and Reporting tools. Through a combination of procedural information and exercises, students can reinforce the concepts that they have learnt. Each unit has a checkpoint for the students to revisit the learnings for a module.

## Objectifs

After completing this course, students should be able to:

- Describe the underlying architecture of the Sterling Configurator Visual Modeler.
