IBM Sterling B2B Integrator Advanced Business Process Modeling

CODE:	DURÉE:	PRIX H.T.:
6S632G	16 Hours	€600.00

Description

The Sterling B2B Integrator Advanced Business Process Modeling course teaches you how to use message options, collect and move data, capture errors, send notifications, and update a database. You will learn about service configurations, the Assign Service, the Invoke Business Process Service, importing resources, and the lightweight JDBC Adapter.

If you are enrolling in a Self Paced Virtual Classroom or Web Based Training course, before you enroll, please review the **Self-Paced Virtual Classes and Web-Based Training Classes** on our Terms and Conditions page, as well as the system requirements, to ensure that your system meets the minimum requirements for this course.
http://www.ibm.com/training/terms

Objectifs

- Differentiate between services, adapters, and activities as they relate to building business processes.
- Configure a business process using the message output options.
- Apply the Assign Service along with DOM or Doc features in a business process.
- Create a business process to capture errors and to notify the user of an error.
- Create a business process to manage 997s.
- Create a business process to send data to different storage locations.
- Use the JDBC Adapter to create a business process to receive configuration values from a database.

Audience

This advanced course is for EDI End User, Web Developer, System Administrator, and Business Analyst.

Prérequis

You must have the following foundation knowledge:

- J2EE Framework **and** N-Tiered Architectures
- Database schemas **and** related concepts
- SQL Scripting
- Sterling B2B Integrator

You must also have specialty **or** advanced Sterling B2B Integrator knowledge in the following areas:

- EDI Processing
- AS2 Implementation
