IBM InfoSphere Advanced QualityStage V11.5

CÓDIGO:	DURACIÓN:	Precio:
KM413G	24 Hours (3 días)	€1,750.00

Description

This course will step you through the QualityStage data cleansing process. You will transform an unstructured data source into a format suitable for loading into an existing data target. You will cleanse the source data by building a customer rule set that you create and use that rule set to standardize the data. You will next build a reference match to relate the cleansed source data to the existing target data.

Objetivos

Please refer to the course overview

Público

The intended audience for this course are: • QualityStage programmers • Data Analysts responsible for data quality using QualityStage • Data Quality Architects • Data Cleansing Developers • Data Quality Developers needing to customize QualityStage rule sets

Requisitos Previos

Participants should have: • Completed the QualityStage Essentials course, or have equivalent experience • familiarity with Windows and a text editor • familiarity with elementary statistics and probability concepts (desirable but not essential)

Programa

After completing this course, you should be able to: • Modify rule sets • Build custom rule sets • Standardize data using the custom rule set • Perform a reference match using standardized data and a reference data set • Use advanced techniques to refine a Two-source match

Fechas Programadas

A petición. Gracias por [contactarnos](#).
