Fundamentals of the IBM Cúram SPM Platform for Developers (Customization) 6.0.5

CODE:	DURÉE:	PRIX H.T.:
ZL1_9D50	40 Hours	€1,500.00

Description

This self-paced course provides you with an understanding of customizing IBM Cúram out-of-the-box (OOTB) solutions using the IBM Cúram Application Development Environment (ADE).

During the first part of the course, you will learn how to interpret the OOTB reference model and processing class architecture using product documentation. The second part of the course lists and describes the client and server artifacts that can be customized and describes the technique for customizing them. The third part of the course explains the techniques used to customize handcrafted services layer interfaces. The last part of the course provides students with an overview of the IBM Cúram Certified Application Developer certification. During the course, students will perform impact analysis on OOTB applications and implement compliant customizations.

If you are enrolling in a Self Paced Virtual Classroom or Web Based Training course, before you enroll, please review the **Self-Paced Virtual Classes and Web-Based Training Classes** on our Terms and Conditions page, as well as the system requirements, to ensure that your system meets the minimum requirements for this course.
http://www.ibm.com/training/terms

Objectifs

- Interpret out-of-the-box artifacts using analysis documentation and product documentation
- Navigate the processing class architecture and explore the purpose of each of its constituent layers
- Describe how to customize client artifacts
- Outline the approaches used to customize server artifacts
- Explain the differences between modeled and handcrafted service layer classes and how to customize handcrafted classes
- Perform gap analysis within IBM Cúram to determine the changes required for customizations
- Implement IBM Cúram-compliant solutions by customizing the OOTB Cúram application

Audience

This intermediate- level course is aimed at developers and technical architects.

Prérequis

You should have completed the following course:

- *Fundamentals of the IBM Cúram SPM Platform for Developers (ADE) 6.0.5 (9D49G)*

You must also have a working knowledge of object-oriented concepts Java, XML, SQL, **and** n-tier enterprise applications.

Programme

- Interpreting the IBM Cúram Enterprise Reference Model and processing class architecture
- Customizing client artifacts compliantly
- Customizing server artifacts compliantly
- Customizing handcrafted classes
- Impact analysis using product documentation

Dates de session
