IBM Cúram Intelligent Evidence Gathering for Developers 6.x

CODE: **DURÉE:** **PRIX H.T.:**

ZL1_9D55 24 Hours €910.00

Description

This self-paced course provides students with a technical understanding of IBM Cúram Intelligent Evidence Gathering (IEG) script development.

This course describes how to develop IEG scripts and integrate these scripts into IBM Cúram SPM applications. The course covers the following topics: the IEG and Datastore schema editors; IEG elements; configuring the look and feel of your scripts; integrating IEG into IBM Cúram Applications; customizing script artifacts, and development tips for creating scripts.

During the course, students will design and implement a simple script that uses key IEG features.

If you are enrolling in a Self Paced Virtual Classroom or Web Based Training course, before you enroll, please review the **Self-Paced Virtual Classes and Web-Based Training Classes** on our Terms and Conditions page, as well as the system requirements, to ensure that your system meets the minimum requirements for this course.
