IBM Cúram Express Rules for Business Analysts 6.0.5

CODE:	LENGTH:	PRICE:
9D48G	32 Hours (4 days)	kr32,380.00

Description

This course provides an introduction to building the rules and rule sets that are developed and published via the IBM Cúram Express Rules (CER) framework. The course describes the key business analysis tasks required to transform legislation or other statutory documentation into rule sets that can be defined, published, and maintained via CER. It introduces the concepts and tasks that underpin rules development, focusing on how rules development can be performed via the CER framework. The course covers out-of-the-box CER functionality. It also enables learners to gain practical experience of the CER Editor operations that are typically required of a range of personnel working on Cúram projects.
If you are enrolling in a Self Paced Virtual Classroom or Web Based Training course, before you enroll, please review the **Self-Paced Virtual Classes and Web-Based Training Classes** on our Terms and Conditions page, as well as the system requirements, to ensure that your system meets the minimum requirements for this course.
http://www.ibm.com/training/terms

Objectives

- Describe what Rules are and what they are used for.
- Analyze legislation and construct rules documentation.
- Describe how Rules relate to Products in Cúram.
- Explain the purpose and features of Rule Sets.
- Outline the functionality and scope of the CER Editor.
- Create new Rule Sets by using the CER Editor.
- Set up new Dynamic Evidence types.
- Explain the significance of generated Rule Sets to Dynamic Products.

Audience

This course provides an introduction to building the rules and rule sets that are developed and published via the IBM Cúram Express Rules (CER) framework. The course describes the key business analysis tasks required to transform legislation or other statutory documentation into rule sets that can be defined, published, and maintained via CER. It introduces the concepts and tasks that underpin rules development, focusing on how rules development can be performed via the CER framework. The course covers out-of-the-box CER functionality. It also enables learners to gain practical experience of the CER Editor operations that are typically required of a range of personnel working on Cúram projects.
