VMware Tanzu Kubernetes Grid: Install, Configure, Manage [V1.0]

CODE:	LENGTH:	PRICE:
VMW_TKGICM1	2 dage	kr 12,050.00

Description

During this two-day course, you will focus on installing VMware Tanzu™ Kubernetes Grid™ on a VMware vSphere™ environment and then you will provision and manage Tanzu Kubernetes clusters.

Objectives

By the end of the course, you should be able to meet the following objectives:

- Describe how Tanzu Kubernetes Grid fits in the VMware Tanzu™ portfolio
- Describe the Tanzu Kubernetes Grid architecture
- Deploy management clusters
- Deploy workload clusters
- Configure your Tanzu Kubernetes Grid instance for authentication, logging, and Kubernetes ingress.
- Perform basic troubleshooting

Audience

VI admins who are responsible for deploying and managing Kubernetes clusters.

Prerequisites

Working knowledge of Kubernetes.

Programme

1 Course Introduction

- Introductions and course logistics
- Course objectives

2 What Is VMware Tanzu Kubernetes Grid?

- VMware Tanzu portfolio
- Management cluster
- Workload clusters
- Cluster plans
- Shared and in-cluster services

3 Deploying Management Cluster

- Prerequisites
- Installing the Tanzu Kubernetes Grid CLI
- Creating management clusters

4 Deploying Workload Clusters

- Creating workload clusters

- • Scaling workload clusters
- • Deleting workload clusters

5 Configuring Tanzu Kubernetes Grid instances

- • Configuring user authentication
- • Configuring logging
- • Configuring ingress control
