IBM Planning Analytics/Cognos TM1: Design and Develop Models in Architect (V10.2)

CÓDIGO:	DURACIÓN:	Precio:
P8261G	40 Hours (5 días)	€2,100.00

Description

This course is designed to teach modelers how to build a basic cube model in TM1 using the Architect tool. Through a series of lectures and hands-on exercises, students will learn how to set up and verify dimensions, cubes, and views, manually enter data into these structures, and define the data that users can see. Students will also learn how to transfer data into the TM1 model, including the use of TurboIntegrator processes. This course is ideal for users who already have models built with Architect and need a high degree of customization, or whose model complexity has evolved past Performance Modeler capabilities.
This training was developed using IBM Cognos TM1 10.2 but is applicable to both IBM Cognos TM1 v10.2 and IBM Planning Analytics.

Objetivos

Please refer to course overview

Público

This advanced course is for modelers.

Requisitos Previos

You should have:

- Basic knowledge of OLAP **and** TM1
- Significant experience with Microsoft Excel spreadsheets (functions, macros, etc.)
- Understanding of the metrics **and** drivers of your business
- IBM Cognos TM1: Analyze and Share Data (V10.2) (recommended)

Programa

- Examine the components of a TM1 model
- Create dimensions
- Build cubes and views
- Load and maintain data
- Add business rules
- Optimize business rules
- Transfer data into the model
- Customize drill paths
- Use rules for advanced modeling
- Convert currencies
- Model for different fiscal requirements
- Deploy TM1 applications to the Web
- Integrate with IBM Cognos BI

Fechas Programadas

A petición. Gracias por contactarnos.

Información Adicional

Esta formación también está disponible en modalidad presencial. Por favor contáctenos para más información.
