# VMware vSphere: Advanced Administration Workshop [V7]

CODE: LENGTH: PRICE:

VMW VSAAW7 40 Hours (5 dage) kr 27,975.00

#### **Description**

This five-day course provides hands-on training to equip students with a range of skills, from performing routine VMware vSphere® 7 administrative tasks to complex vSphere operations and configurations. Through lab-based activities, students are immersed in real-life situations faced by VMBeans, a fictitious company. These situations expose students to real-life scenarios faced by companies that are building and scaling their virtual infrastructure.

Approximately 90% of the class is application-focused and taught through labs. The course aligns fully with the VMware Certified Advanced Professional – Data Center Virtualization Deploy exam objectives.

#### **Objectives**

By the end of the course, you should be able to meet the following objectives:

- Configure and manage complex storage solutions in a vSphere environment (including NFS, iSCSI, and so on)
- Configure and manage complex, scalable vSphere networking operations (vSphere Standard Switch and Distributed Switches)
- Deploy, manage, and optimize virtual machines (advanced configuration, content library, latency-sensitive workloads, and more)
- Manage business continuity and operations in your vSphere environment (VMware vCenter® Server Appliance™ file-based backup, VMware vCenter Server® profiles, host profiles, and so on)
- Plan and implement increased vSphere security (use a Key Provider, VM Encryption, CPU scheduler remediations, and so on)
- Troubleshoot the vSphere environment
- • Use VMware vSphere® Lifecycle Manager™ to upgrade to VMware ESXi™ hosts and virtual machines (VUM, image-based clusters, and so on)
- Implement vSphere cluster solutions (Cluster QuickStart wizard, VMware vSphere® Distributed Resource Scheduler™, VMware vSphere® High Availability, VMware vSAN™, and so on)
- • Implement resource optimizations to streamline vSphere deployments
- Create an advanced configuration of vCenter Server (including an identity source)

#### **Audience**

- • System administrators
- • System engineer

#### **Prerequisites**

This course requires the following prerequisites:

- Completion of VMware vSphere: Optimize and Scale [V7] course
- • VMware Certified Professional Data Center Virtualization (VCP-DCV) certification
- System administration experience on Microsoft Windows or Linux operating systems

#### **Programme**

#### 1 Course Introduction

- · Introductions and course logistics
- Course objectives
- Introduction to fictitious company: VMBeans

#### 2 Configure and Manage Your vSphere Environment

- · Perform various vCenter Server configurations
- · Configure an external identity source
- · Configure virtual networking with advanced options
- Configure and manage advanced storage configurations
- · Configure vSphere clusters (also using Cluster QuickStart)

#### 3 Management and Operations in Your Data Center

- Collect vSphere log files
- Configure vCenter Server file-based backup
- Working with vCenter Server profiles
- Configure and manage advanced cluster settings
- · Create and configure advanced host options
- · Create and manage host profiles
- • Manage and remediate clusters using vSphere Lifecycle Manager
- · Create and configure a Content Library
- • Update a managed virtual machine template
- •

#### Configure a central VMware ToolsTM installation repository

- Manage vSphere roles and permissions
- 4 Troubleshoot Your Data Center Environment
  - • Troubleshoot vSphere configuration issues
  - • Troubleshoot resource pool configuration issues
  - Troubleshoot network and storage issues
  - • Troubleshoot ESXi host issues
  - • Troubleshoot vCenter Server resource issues

#### 5 Increasing Security in Your Data Center

- • Create and manage a Key Management solution
- Create an encrypted virtual machine
- Configure CPU scheduler options to achieve security remediations

#### 6 Performance and Optimization in Your Data Center

- • Manage advanced virtual machine configurations
- · Identify and implement vSphere resource optimization opportunities

#### **Session Dates**

Date	Location	Time Zone	Language	Туре	Guaranteed	PRICE
27 May 2024	Virtual Classroom (CET / UTC +1)	CEDT	English	Instructor Led Online		kr 27,975.00
