Description

This course enables a new system operator to develop basic to intermediate level skills needed for day-to-day operations of the Power System with IBM i. Specifically, the course explains how to:

- Use the online help and references
- Send, display, and reply to messages
- · Monitor and control jobs, devices, and job and output queues
- Start and stop the system
- Create and change user profiles
- Use authorization lists and group profiles
- Manage system configuration
- · Save and restore objects, libraries, and the system
- Monitor job and history logs
- Diagnose a system problem
- Order, receive, and apply PTFs
- · Perform all of these functions using a 5250 emulation session as well as IBM i Access Client Solutions and IBM Navigator for i

Hands-on exercises reinforce the lecture topics and prepare the student to successfully operate a Power System with IBM i.

Objectifs

- · Send, display, and respond to messages
- Use the online help and reference materials
- · Monitor and control job queues, active jobs, and output queues
- Create and change user profiles
- Use authorization lists and group profiles
- Start and stop Power Systems with IBM i
