# IBM Tape Encryption Implementation

<b>CÓDIGO:</b>	<b>DURACIÓN:</b>	<b>Precio:</b>
SS27G	16 Hours (2 días)	€1,100.00

## Description

Learn about the IBM TS1120 and LTO4 Tape Encryption and its components. The IBM tape encryption key manager is discussed along with the benefits provided by IBM tape encryption. System managed tape encryption using z/OS and DFSMS and the AIX device driver are presented. Application managed tape encryption using IBM Tivoli Storage Manager (TSM) is also discussed. This course will also go into details on the new EKM Release 2 along with the differences of using LTO4 tape encryption for open systems.

## Objetivos

- Describe IBM tape encryption and the benefits of using it.
- Define the IBM tape encryption key manager (EKM).
- Illustrate system managed using the AIX device driver.
- Characterize application managed tape encryption using the Tivoli Storage Manager (TSM).
- Discover what is new in EKM Release 2
- Understand how to use new EKM Release 2 with TS1120 tape drives
- Know the differences between TS1120 encryption and LTO4
- State system managed tape encryption system managed on System z using z/OS and DFSMS
- Explain the purpose of IBM tape encryption z/OS keys and how they are used.
- Specify the steps involved in configuring IBM tape encryption.

## Público

This basic course is intended for individuals responsible for implementing IBM Tape Encryption.

## Requisitos Previos

No prerequisites are required, but an understanding of tape subsystems either by education **or** on-the-job training will help you understand some of the basic tape terminology currently being used on the platform.

It is recommended you attend: Introduction to Storage (SS01) More details are available at [www.ibm.com/training](http://www.ibm.com/training)

## Programa

- Overview
- Encryption Key Manager (EKM)
- System-Managed Encryption: AIX Device Driver
- Application-Managed Encryption: Tivoli Storage Manager (TSM)
- TS3500 Tape Encryption
- 3592 E05 Encryption
- EKM Release 2
- LTO4 Encryption
- System Managed Encryption: z/OS DFSMS
- z/OS Key Management
- Tape Encryption Configuration

## **Más información**

Prior to enrolling, IBM Employees must follow their Division/Department processes to obtain approval to attend this public training class. Failure to follow Division/Department approval processes may result in the IBM Employee being personally responsible for the class charges.

GBS practitioners that use the EViTA system for requesting external training should use that same process for this course. Go to the EViTA site to start this process: <http://w3.ibm.com/services/gbs/evita/BCSVTEnr1.nsf>

Once you enroll in a GTP class, you will receive a confirmation letter that should show: The current GTP list price  
The 20% discounted price available to IBMers. This is the price you will be invoiced for the class.

## **Fechas Programadas**

A petición. Gracias por [contactarnos](#).

## **Información Adicional**

[Esta formación también está disponible en modalidad presencial. Por favor contáctenos para más información.](#)
