IBM Cognos Report Studio Authoring Professional Reports Fundamentals (V10.2.2)

CODE:	DURÉE:	PRIX H.T.:
B5A58G	24 Hours (3 Jours)	€2,100.00

Description

IBM Cognos Report Studio: Author Professional Reports Fundamentals (V10.2.2) is designed for professional report authors to learn report building techniques using relational data models, and methods of enhancing, customizing, and managing professional reports. You will participate in hands-on demos and workshops that illustrate key concepts while learning how to use the product.

Objectifs

Please refer to the Course Overview for description information.

Audience

This intermediate course is for Professional Report Authors.

Prérequis

You should have completed:

- IBM Cognos BI for Consumers (10.2) WBT

You should have:

- Knowledge of your business requirements
- Experience using the Windows operating system
- Experience using a Web browser

Programme

Introduction to the Reporting Application

- Examine Report Studio and its interface
- Explore different report types
- Create a simple, sorted, and formatted report
- Explore how data items are added to queries

Create List Reports

- Format, group, and sort list reports
- Describe options for aggregating data
- Create a multi-fact query
- Create a report with repeated data

Focus Reports Using Filters

- Create filters to narrow the focus of reports
- Examine detail filters and summary filters
- determine when to apply filters on aggregate data

Create Crosstab Reports

- Format and sort crosstab reports
- Convert a list to a crosstab
- Create crosstabs using unrelated data items
- Create complex crosstabs using drag and drop functionality

Present Data Graphically

- Create charts containing peer and nested items
- Add context to charts
- Create and reuse custom chart palettes
- Add RAVE visualizations
- Present key data in a single dashboard report

Focus Reports Using Prompts

- Identify various prompt types
- Use parameters and prompts to focus data
- Search for prompt items
- Customize prompts to facilitate users' choices
- Navigate between pages
- Display users' prompt selections in the report

Extend Reports Using Calculations

- Create calculations based on data in the data source
- Add run-time information to the reports
- Create expressions using functions

Use Additional Report Building Techniques

- Reuse objects within the same report
- Share layout components among separate reports
- Discuss report templates
- Add pages to a report
- Choose options to handle reports with no available data

Customize Reports with Conditional Formatting

- Create multi-lingual reports
- Highlight exceptional data
- Show and hide data
- Conditionally render objects in reports

Drill-Through From One Report to Another

- Let users navigate from a specific report to a target report
- Pass parameter values to filter the data in drill-through targets

Drill-through Definitions

- Enable users to navigate to related data in IBM Cognos BI
- Parameter-driven drill through vs. dynamic drill through
- Steps to enable drill-through access for a package
- Limit the items that users can drill through from (set scope)
- Set a measure as the scope
- Drill Through Assistant

Enhance Report Layout

- Force page breaks in reports
- Modify existing report structures
- Apply horizontal formatting
- Specify print options for PDF reports
- Combine data containers displaying data from different queries
- Format data and report objects

Appendix A. Overview of IBM Cognos BI

- Describe IBM Cognos BI and Financial Performance Management
- Describe IBM Cognos BI components
- Describe IBM Cognos BI architecture at a high level

- Define IBM Cognos groups and roles
- Explain how to extend IBM Cognos
