Essentials for IBM Cognos BI (V10.2.2)

CODE: **DURÉE:** **PRIX H.T.:**

B5A70G 40 Hours (5 Jours) €3,480.00

Description

This accelerated offering is intended for core project team members wishing to acquire a broad understanding of a Business Intelligence platform implementation. During the ILT segments, participants will perform hands-on demos and workshops that cover three essential topic areas: modeling, report authoring, and administration of a BI platform. Throughout the ILT, participants will be guided to more-in depth training offerings and paths leading to certification. During the WBT portion of the course, students will be required to complete 22.5 hours of eLearning (6 WBTs and 1 recording).

Objectifs

Please refer to course overview for details.

Audience

This advanced course is for:

- Project Managers
- Technical Analysts
- Developers

Prérequis

You should have:

- Knowledge of your business requirements
- Experience using the Windows operating system
- Experience using a web browser

Programme

Overview of IBM Cognos BI

- Describe IBM Cognos Business Intelligence (BI) and its position within the IBM Smarter Analytics approach and offerings
- Describe the IBM Cognos 10 Family of offerings
- Describe IBM Cognos BI enterprise components
- Describe IBM Cognos architecture at a high level
- Describe IBM Cognos BI security at a high level
- Explain how to extend IBM Cognos BI

Identify Common Data Structures

- Define the role of a metadata model in Cognos BI
- Distinguish the characteristics of common data structures
- Understand the relative merits of each model type
- Examine relationships and cardinality
- Identify different data traps
- Identify data access strategies

Defining Requirements

- Examine key modeling recommendations
- Define reporting requirements
- Explore data sources to identify data access strategies
- Identify the advantages of modeling metadata as a star schema
- Model in layers

Creating a Baseline Project

- Follow the IBM Cognos and Framework Manager workflow processes
- Define a project and its structure
- Describe the Framework Manager environment
- Create a baseline project
- Enhance the model with additional metadata

Preparing Reusable Metadata

- Verify relationships and query item properties
- Create efficient filters by configuring prompt properties

Model for Predictable Results: Identify Reporting Issues

- Describe multi-fact queries and when full outer joins are appropriate
- Describe how IBM Cognos uses cardinality
- Identify reporting traps
- Use tools to analyze the model

Model for Predictable Results: Virtual Star Schemas

- Understand the benefits of using model query subjects
- Use aliases to avoid ambiguous joins
- Merge query subjects to create as view behavior
- Resolve a recursive relationship
- Create a complex relationship expression

Model for Predictable Results: Consolidate Metadata

- Create virtual facts to simplify writing queries
- Create virtual dimensions to resolve fact-to-fact joins
- Create a consolidated modeling layer for presentation purposes
- Consolidate snowflake dimensions with model query subjects
- Simplify facts by hiding unnecessary codes

Calculations and Filters

- Use calculations to create commonly-needed query items for authors
- Use static filters to reduce the data returned
- Use macros and parameters in calculations and filters to dynamically control the data returned

Implementing a Time Dimension

- Make time-based queries simple to author by implementing a time dimension
- Resolve confusion caused by multiple relationships between a time dimension and another table

Specifying Determinants

- Use determinants to specify multiple levels of granularity and prevent double-counting

Creating the Presentation View

- Identify the dimensions associated with a fact table
- Identify conformed vs. non-conformed dimensions
- Create star schema groupings to provide authors with logical groupings of query subjects
- Rapidly create a model using the Model Design Accelerator

Creating Analysis Objects

- Apply dimensional information to relational metadata to enable OLAP-style queries
- Sort members for presentation and predictability
- Define members and member unique names
- Identify changes that impact a MUN

Introduction to the Reporting Application

- Examine Report Studio and its interface
- Explore different report types
- Create a simple, sorted, and formatted report
- Explore how data items are added to queries

Create List Reports

- Group, format, and sort list reports
- Describe options for aggregating data
- Create a multi-fact query
- Create a report with repeated data

Focus Reports Using Filters

- Create filters to narrow the focus of reports
- Examine detail filters and summary filters
- Determine when to apply filters on aggregate data

Create Crosstab Reports

- Format and sort crosstab reports
- Create complex crosstabs using drag and drop functionality
- Create crosstabs using unrelated data items

Present Data Graphically

- Create charts containing peer and nested columns
- Present data using different chart type options
- Add context to charts
- Create and reuse custom chart palettes
- Introduction to visualization
- Present key data in a single dashboard report

Focus Reports Using Prompts

- Identify various prompt types
- Use parameters and prompts to focus data
- Search for prompt types
- Navigate between pages

Extend Reports Using Calculations

- Create calculations based on data in the data source
- Add run-time information to the reports
- Create expressions using functions

Customize with Conditional Formatting

- Create multi-lingual reports
- Highlight exceptional data
- Show and hide data
- Conditionally render objects in reports
- Conditionally format one crosstab measure based on another

Drill-Through from One Report to Another

- Let users navigate from a specific report to a target report
- Pass parameter values to filter the data in drill-through targets
- Navigate through multiple reports

Create a Report Using Relational Data

- Describe relational data
- Choose a report format
- Build a report
- Use available query items
- Use calculated query items

Introduction to IBM Cognos BI Administration

- A brief overview of IBM Cognos BI
- The role of the Administrator in relation to the
- IBM Cognos BI administration workflow process
- The role of IBM Cognos Administration and IBM Cognos Configuration

Identify IBM Cognos Architecture

- The features of the IBM Cognos BI architecture
- The three architectural tiers
- IBM Cognos BI servlets and services
- The default servlet container and alternatives to its use
- Example: IBM Cognos BI request processing
- Examine the log server
- Performance planning
- Installation planning and options
- Load balancing mechanisms
- Request affinity
- Configuration options
- The IBM Cognos Application Firewall

Secure the IBM Cognos BI Environment

- Identify the IBM Cognos BI security model
- Define authentication and authorization in IBM Cognos BI
- Identify security policies
- Secure the IBM Cognos BI environment

Manage Run Activities

- Manage current, upcoming and past activities
- Manage schedules
- Enable and disable schedules
- Set queue priority for schedules
- Suspend a schedule until a later time

Manage Content in IBM Cognos Administration

- Add a data source
- Distribute data and create a distribution list
- Populate the visualization library
- Plan a deployment
- Create deployment folders
- Export and import entries
- Identify how to maintain the IBM Cognos BI content store
- Configure saving content
- Customize the appearance of IBM Cognos BI using styles
- Use portlets to display custom Web content

eLearning

- *IBM Cognos for Microsoft Office: Integrate with Microsoft Office (v10.1/10.2) (B5130G)*
- *IBM Cognos BI Event Studio: Create and Manage Agents (v8.4/10.1) (B5131G)*
- *IBM Cognos Transformer: Create PowerCubes (v10.1) - recording (B5169G)*
- *IBM Cognos Workspace Advanced: Introduction (v10.2.2) (B5A83G)*
- *IBM Cognos Workspace Advanced: Intermediate (v10.2.2) (B5A84G)*
- *IBM Cognos BI for Consumers (v10.2.2) (B5A88G)*
- *IBM Cognos Workspace: Create Workspaces (v10.2.2) (B5A17G)*
