PAN-220	16 Hours (2 days)	\$1,995.00

Description

Overview

The Palo Alto Networks Panorama 9.1:Managing Firewalls at Scale (EDU-220) course is two days of instructor-led training that will help you:

- Learn how to configure and manage the next-generation Panorama™ management server
- Gain experience configuring templates (including template variables) and device groups
- Gain experience with administration, log collection, and logging and reporting
- Gain experience with Panorama™ High Availability and Panorama™ troubleshooting
- Become familiar with new Panorama™ features such as Panorama™ in the public cloud, the Logging Service, and GlobalProtect cloud service

Objectives

Course Objectives

This course will help students to gain in-depth knowledge about how to configure and manage their Palo Alto Networks® Panorama™ management server. Upon completion of this course, administrators should be familiar with the Panorama™ management server's role in managing and securing their overall network. Network professionals will be shown how to use Panorama™ aggregated reporting to provide them with a holistic view of a network of Palo Alto Networks® next-generation firewalls.

Audience

Target Audience - Security Administrators, Security Operations Specialists, Security Analysts, Security Engineers, and Security Architects

Prerequisites

Prerequisites

Students must complete the Firewall 9.0 Essentials: Configuration and Management (EDU-210) class, and be familiar with Palo Alto Networks® next-generation firewall management and basic networking concepts, including routing and IP addressing.
