VMware Tanzu Mission Control: Management and Operations 2020

CODE:	LENGTH:	PRICE:
VMW_TMCMO2020	8 Hours (1 day)	£700.00

Description

During this one-day course, you focus on using VMware TanzuTM Mission ControlTM to provision and manage Kubernetes clusters. The course covers how to manage on-premise and cloud-based Kubernetes clusters and how to apply access, image registry, and network policies to clusters.

Objectives

By the end of the course, you should be able to meet the following objectives: • Describe the Tanzu Mission Control architecture • Configure user and group access • Create and manage Kubernetes clusters • Create access, image registry, and network policies • Monitor cluster health and perform cluster inspections

Audience

VI administrators or application owners who are responsible for deploying and managing Kubernetes clusters and workloads

Prerequisites

• Working knowledge of Kubernetes. •Working knowledge of Amazon Web Services (AWS) is beneficial if you intend to deploy Kubernetes clusters on AWS.

Programme

1 Introducing VMware Tanzu Mission Control • VMware Tanzu Mission Control • Accessing Tanzu Mission Control • Access control • Architecture 2 Policy-Driven Cluster Management • Policy-Driven Cluster Management • Access Policies • Image Registry Policies • Network Policies • Network Policies 3 Cluster Management • Attached Clusters • Cloud Provider Accounts • Provisioned Clusters • Cluster Health • Cluster Inspections
