Description

This one-day course teaches you how to use the VMware Carbon Black® EDR™ product and leverage the capabilities to configure and maintain the system according to your organization's security posture and policies. This course provides an in-depth, technical understanding of the Carbon Black EDR product through comprehensive coursework and hands-on scenario-based labs.

Objectives

By the end of the course, you should be able to meet the following objectives:

- • Describe the components and capabilities of the Carbon Black EDR server
- • Identify the architecture and data flows for Carbon Black EDR communication
- • Describe the Carbon Black EDR server installation process
- • Manage and configure the Carbon Black EDR sever based on organizational requirements
- • Perform searches across process and binary information
- • Implement threat intelligence feeds and create watchlists for automated notifications
- • Describe the different response capabilities available from the Carbon Black EDR server
- • Use investigations to correlate data between multiple processes

Audience

System administrators and security operations personnel, including analysts and managers

Programme

1 Course Introduction

- • Introductions and course logistics
- • Course objectives

2 Planning and Installation

- • Hardware and software requirements
- • Architecture
- • Data flows
- • Server installation review
- • Installing sensors

3 Server Administration

- • Configuration and settings
- • Carbon Black EDR users and groups

4 Process Search and Analysis

- • Filtering options
- • Creating searches
- • Process analysis and events

5 Binary Search and Banning Binaries

- • Filtering options
- • Creating searches
- • Hash banning

6 Search best practices

- • Search operators
- • Advanced queries

7 Threat Intelligence

- • Enabling alliance feeds
- • Threat reports details
- • Use and functionality

8 Watchlists

- • Creating watchlists
- • Use and functionality

9 Alerts / Investigations / Response

- • Using the HUD
- • Alerts workflow
- • Using network isolation
- • Using live response
