## Description

This one-day course teaches you how to use the advanced features of the VMware Carbon Black® EDR™ product. This usage includes gaining access to the Linux server for management and troubleshooting in addition to configuring integrations and using the API. This course provides an in-depth, technical understanding of the Carbon Black EDR product through comprehensive coursework and hands-on scenario-based labs. This class focuses exclusively on advanced technical topics related to the technical back-end configuration and maintenance.

## Objectives

By the end of the course, you should be able to meet the following objectives:

- Describe the components and capabilities of the Carbon Black EDR server
- Identify the architecture and data flows for Carbon Black EDR communication
- Identify the architecture for a cluster configuration and Carbon Black EDR cluster communication
- Describe the Carbon Black EDR server data types and data locations
- Use the API to interact with the Carbon Black EDR server without using the UI
- Create custom threat feeds for use in the Carbon Black EDR server
- Perform the integration with a syslog server
- Use different server-side scripts for troubleshooting
- Troubleshoot sensor-side configurations and communication

## Audience

System administrators and security operations personnel, including analysts and managers

## Prerequisites

This course requires completion of the following course:

- VMware Carbon Black EDR Administrator

## Programme

### 1 Course Introduction

- Introductions and course logistics
- Course objectives

### 2 Architecture

- Data flows and channels
- Sizing considerations
- Communication channels and ports

### 3 Server Datastores

- SOLR database

- • Storage configurations and data aging
- • Partition states
- • Postgres
- • Modulestore

#### 4 EDR API

- • CBAPI overview
- • Viewing API calls in the browser
- • Utilizing the API to access data

#### 5 Threat Intelligence Feeds

- • Feed structure
- • Report indicator types
- • Custom threat feed creation and addition

#### 6 Syslog Integration

- • SIEM support
- • Configuration

#### 7 Troubleshooting

- • Server-side scripts
- • Server logs
- • Sensor operations

### Session Dates

On request. Please [Contact Us](#)

### Additional Information
