IBM Cognos Analytics: Author Reports Fundamentals (v11.0.x) French

CODE:	LENGTH:	PRICE:
B6158FG	24 Hours (3 days)	kr24,285.00

Description

This offering provides Business and Professional Authors with an introduction to report building techniques using relational data models. Techniques to enhance, customize, and manage professional reports will be explored. Activities will illustrate and reinforce key concepts during this learning opportunity.

This is a fully translated French course - all materials including the lab environment are provided in French. To see a translated overview of this course, visit <https://ibm.biz/BdzQMR>

Objectives

- What is IBM Cognos Analytics – Reporting
- Examine dimensionally modelled and dimensional data sources
- Examine personal data sources and data modules
- Examine List reports
- Aggregate measure/fact data
- Use shared dimensions to create multi-fact queries
- Add repeated information to reports
- Create crosstab reports
- Create complex crosstab reports
- Format, sort, and aggregate data in a crosstab report
- Create discontinuous crosstab reports
- Create Visualization reports
- Add business logic to reports using IBM Cognos Analytics – Reporting
- Focus reports using filters
- Focus reports using prompts
- Augment reports using calculations
- Extend report functionality in IBM Cognos Analytics - Reporting
- Customize reports with conditional formatting
- Conditionally format one crosstab measure based on another
- Drill-through definitions
- Enhance the report layout
- Use additional report building techniques

Audience

Report Authors

Prerequisites

- Knowledge of your business requirements
- IBM Cognos Analytics for Consumers (v11.0) WBT or equivalent knowledge

Programme

What is IBM Cognos Analytics - Reporting?

- Create a simple list report

- Create a report from a dimensionally modeled relational data source

Examine list reports

- Group data in a list

- Format columns in a list

- Include headers and footers in a list

- Enhance a list report

Aggregate measure/fact data

- Identify differences in aggregation

- Explore data aggregation

Create crosstab reports

- Add measures to a crosstab

Examine personal data sources and data modules

- Upload personal data

- Upload custom images

- Use navigation paths

- Create a report from a personal data source

- Use shared dimensions to create multi-fact queries

- Create a multi-fact query in a list report

Create complex crosstab reports

- Add items as peers

Add repeated information to reports

- Create a mailing list report

Format, sort, and aggregate data in a crosstab

- Sort, format, and aggregate a crosstab report

Create a visualization report

- Create and format a visualization report

- Create a report that uses a Map visualization

- Show the same data graphically and numerically

Focus reports using prompts

- Create a prompt by adding a parameter

- Add a value prompt to a report

- Add a Select & search prompt to a report

- Create a cascading prompt

Customize reports with conditional formatting

- Create a multilingual report

- Highlight exceptional data and conditionally render a column

Enhance report layout

- Create a report structured on data items

- Create a condensed list report

Augment reports using calculations

- Add calculations to a report

- Display prompt selections in the report title

Use additional report building techniques

- Section a report and reuse objects within the same report

- Reuse layout components in a different report

- Explore options for reports that contain no data
