IBM Spectrum Protect 8.1.6 Implementation and Administration

CÓDIGO: **DURACIÓN:** **Precio:**

TS617G 40 Hours (5 días) €2,500.00

Description

IBM Spectrum Protect 8.1.6 is a data backup and recovery solution designed to help you manage your data retention, reduce the cost of storage, and provide appropriate recovery point objectives to meet any service level agreement. IBM Spectrum Protect offers improved efficiency and flexibility using object-based data management and policy driven retention. Please note that a later version of this course, TS618G, IBM Spectrum Protect V8.1.9 - Implementation and Administration, is available.

This five day course will focus on implementation and basic administration of a IBM Spectrum Protect environment. The hands-on lab exercises are performed on a Windows 2012 environment. The course materials include examples of AIX and Linux commands, when different from Windows.

Objetivos

At the end of this course you should be able to:

- Describe the purpose of IBM Spectrum Protect
- Install and configure the IBM Spectrum Protect components
- Discuss storage methodology options and create storage pool
- Customize data movement and retention policies to meet business requirements
- Configure the IBM Spectrum Protect database and storage pools for protection
- Perform backup, restore, archive and retrieve operations
- Organize daily tasks required to protect the IBM Spectrum Protect environment
- Automate and monitor client and administrative tasks and events
- Use the administrative and client interfaces
- Optimize client configuration

Público

Implementers and administrators who are new to IBM Spectrum Protect data management.

Requisitos Previos

Ability to navigate Windows 2012

A basic understanding of concepts regarding client/server relationships

Programa

Unit 1 Components and concepts

Unit 2 Installation and configuration

Unit 3 Interfaces and monitoring

Unit 4 Storage pools and devices

Unit 5 Policy management, data movement, and exploration

Unit 6 Database and storage pool management

Unit 7 Client configuration and management

Unit 8 Client data protection

Unit 9 Daily operations and maintenance

Unit 10 Schedules and reports
