Citrix Workspace Microapps Essentails

CODE:	LENGTH:	PRICE:
CTX_CWS-206	24 Hours (3 days)	€2,350.00

Description

This foundational course to Citrix Workspace intelligence ushers students into the new generation of Citrix teaching how intelligent features help organize, guide, and automate the future of work.
Gain an understanding of the fundamentals of web services, APIs, and systems integrations through building microapps designed to boost employee productivity and optimize the end user experience.
This three-day course will cover the fundamentals of Citrix Microapps, web services, security considerations and API troubleshooting to help you successfully deploy microapps in your environment.

Objectives

- Gain foundational knowledge of Citrix Intelligent Workspace to be successful with Citrix microapps.
- How to deploy and configure Citrix Intelligent Workspace Microapps as well as the fundamentals of APIs and Systems of Record (SoR) integrations
- Deploy microapps from existing templates, as well as custom System of Record integrations and microapp deloyment

Audience

Built for IT professionals looking to build and deploy microapps with Citrix Workspace. Potential students include administrators, engineers or application developers, and architects responsible for the Citrix Workspace experience

Prerequisites

This course requires little to no previous experience with web development, APIs, or system integrations, however, Citrix recommends a familiarity with Citrix Digital Workspace or Citrix Cloud prior to attending this course. Those without this experience might consider the CWS-215 Citrix Virtual Apps and Desktops 7 Administration as a starting point

Programme

Module 1: Introduction to Citrix Intelligent Workspace • Intelligent Workspace Overview • Use Cases and Design Considerations
• Feature and Functionality Overview • Terminology and Key Concepts Module 2: Citrix Intelligent Workspace Architecture
• Services, components, communication workflows • Security considerations
• Microapp Service, SoR, DiPs, notification service Module 3: Microapps & API Essentials
• DIPs, APIs, Restful Web Services, HTTP, XML, JSON, OData-JSON
• Types of microapps – actions, events, etc• Microapp planning, Out of the box (OOO) microapps • HTTP microapps
• Custom Microapps high level overview Module 4: Data Tier • System of record security considerations
• Endpoint security considerations • Data models and schemas Module 5: Microapp Troubleshooting and Security • Auditing
• Common Microapp troubleshooting • General API troubleshooting for Workspace intelligence features
